Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status of the Application

Claims 17-33 are pending in the application.

The amendment of the specification, cancellation of claims 1-16, and addition of claims 17-33 in a Preliminary Amendment are acknowledged.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17-23, drawn to polynucleotides encoding and vectors and host cells expressing poxB, classified in class 435, subclass 252.3.
- II. Claim 24, drawn to a Coryneform bacterium host cell with a deletion or insertion in the poxB gene, classified in class 435, subclass 252.1.
- III. Claims 25-33, drawn to a process for the production of amino acids, classified in class 435, subclass 106.

The inventions are distinct, each from the other because:

The host cell of Group I and the host cell of Group II each comprises a chemically unrelated structure capable of separate manufacture, use and effect. The host cell of Group I can be used for overexpression of the poxB gene, while the host cell of Group II can be used for the production of L-amino acids.

The host cell of Group I is unrelated to the method(s) of Group III as it is neither used nor made by the method(s) of Group III.

Groups II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for

using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the host cell of Group II can be used for plasmid propagation or protein expression.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art and **require a separate search** resulting in an undue search burden on the Examiner, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Steadman, whose telephone number is (703) 308-3934.
